### **LETTER OF REFERENCE**

DIMON PLC is an American company, an international leader in the tobacco industry, with a local branch in Bulgaria. This letter is to certify that Architectural Design Agency – ADA Ltd. has been contracted by DIMON Bulgaria as the design company for the Tobacco Manipulation Factory Project in the town of Haskovo. In 1998 ADA was selected among six Bulgarian design companies to prepare the feasibility study, a master plan and the complete design and tender documentation for a 320 000 sq. l. industrial building. The design and tender documentation were submitted in March 2000.

The team of ADA has shown high professionalism and high level of communication during the whole process of decision-making and design so far and will be later engaged in the supervision of construction. Design and documentation fully satisfy our expectations and have been delivered in both English and Bulgarian languages. The design has been transferred during its different stages to our head office in Vienna via the Internet. Submission of design in Auto CAD 14 format was a requirement of the contract.

Sincerely yours,

DIMON Bulgaria EOOD, Haskovo
